Make Your Own Fruit Chat

Farah wants to make fruit chat. "Mmmmm... I really want to have some", she says to her mother.

"Oh, then why don't you make it on your own?" says her mother.

Farah goes into the kitchen with her mother. "What fruit must I put?" she asks herself, "I think I will put some bananas, apples and grapes. Also, I will add some melon and guava to it".

She picks up the apples and peels them. Next, she cut small cubes of the apples and put them in a big bowl. She peels the bananas, cuts them and put the slices in the same bowl. The same thing she does with a melon and a few guavas. After that, she washes some grapes and adds them into the bowl. Now, her bowl is filled up to the brim with chunks of different types of fruit. She is really happy to see them.

Her mother adds some crushed sugar, pinch of salt and pepper. They toss the bowl and stir the fruit well.

Yummy fruit chat was now ready for them to eat!

Make Your Own Fruit Chat
